

# Industrial 6x18" Elements

**Dimensions:**

Height 18"/457mm

Diameter 6"/152mm

*Inside Diameters Vary -- see below*

## Features

Industry-standard 6x18" replacement filters are available with many media choices — simply select the cleanliness level that's needed for your application.

Dimensions fit standard industrial filter housings, and the filters accommodate flow up to 300 gpm per 18" unit. Use the elements singly, or stack multiples within the housing.

The filters are a direct replacement for 6x18 filters from Kaydon, Hilco, Pall, Parker, Baldwin, Nugent, and others. They are the industry-standard size for large lube oil applications, including air compressors, hydraulic return line circuits, etc.

### 6 x 18 Hydraulic Replacement Cartridges

Media No.	Media Technology	Efficiency	Part Number	ID
½	Synteq®	β=1000 *	P178729	2.6"/66mm
1	Synteq®	β=1000 <5μm <sub>(c)</sub>	P176202	3.2"/81mm
2	Synteq®	β=1000 5μm <sub>(c)</sub>	P170102	2.6"/66mm
9	Synteq®	β=1000 20μm <sub>(c)</sub>	P170103	2.6"/66mm
9	Synteq®	β=1000 20μm <sub>(c)</sub>	P176205	3.2"/81mm
5	Cellulose	β=1000 17μm <sub>(c)</sub>	P550212	2.6"/66mm
10	Cellulose	β=1000 21μm <sub>(c)</sub>	P550213	2.6"/66mm
25	Cellulose	β=200 45μm <sub>(c)</sub>	P550216	2.6"/66mm

\* Beyond the capability of the particle counter.
