ROTORCRAFT INLET BARRIER FILTER SYSTEMS for AgustaWestland AW109E/S/SP, AW119 KOALA, AW119KE HELICOPTERS
INSTALL BEFORE FLIGHT

Helicopters routinely contend with dust, sand and debris that attack turbine engines and impact engine reliability hampering efficient engine operation. Installing an Inlet Barrier Filter (IBF) system is the most effective way to protect engines from damage ranging from lost efficiency to catastrophic failure while adding significant advantages.

- Meet established engine time between overhaul requirements
- More power available than alternate filtration systems
- Longer engine life due to elimination of erosion
- Reduced engine maintenance cost
- Available factory-direct

PERFORMANCE AT-A-GLANCE
