

Stepped SealClamp™ Exhaust Clamp

Fewer Parts, Lighter Weight and Easier to Install

Easier to install!

- Pre-assembled with fewer parts
- Requires less torque than other designs
- One wrench installation
- Reversible threaded nut bar

Visual torque indicator

- Lower torque makes for easier and quicker installation
- Groove provides a visual guide to proper torque

360° stepped shape improves joint seal

- Reduces exhaust leaks by more than 65% compared to other non-gasketed clamp designs
- Resistance to joint separation is nearly twice that of other brands
- Conforms tightly to overlapping connections – ideal for most overlapping I.D. to O.D. joints
- Reduced flex pipe pinching
- Reduces exhaust noise

Quality materials

- .14-.20 lbs. lighter than other brands
- Improved rust resistance
- Available in stainless or aluminized steel with aluminum and zinc-plated components
- High strength, grade 8 fasteners

U.S. Patent Nos. 6,116,659;
6,634,607 B2; and 6,796,004 B2

Bolts fit both 9/16"
and 14mm wrenches

Three Simple Installation Steps

1

1. Position the SealClamp over the smallest tube. Larger end of the clamp must be on the overlapping tube or flex.

2

2. Locate the step of the clamp to the overlapping tube at the joint.

3

Open

3. Using the groove as a visual guide, **alternately** tighten bolts until the groove is approximately half closed (~50 ft. lbs).

Note: Do not exceed 70 ft. lbs. torque as clamp damage may occur.

Closed
