

# Adsorbent Breather Assembly

Product Information - Integrated Venting Solutions

The Adsorbent Breather Assembly (ABA) provides protection from particulate, hydrocarbons, acid and base gases, and the effects of water vapour, such as condensation, corrosion and fungal growth.

## Typical Construction

The ABA combines a breather filter, adsorbent pouch filter and a diffusion channel into a single filter assembly. A pressure-sensitive adhesive label secures the filter over an access port in the device.

Typical ABAs include:

- **Tetratex® High Efficiency ePTFE membrane breather** - Acts as a particulate barrier whilst allowing necessary gases to flow through
- **Diffusion channel** - Reduces the passage of gases and water vapour
- **Plastic housing** - Incorporates breather, diffusion channel and adsorbent in one product
- **Adsorbents** (available individually or in combination)
  - **Activated carbon adsorbent** - Provides relative humidity control and adsorption of acid gases and hydrocarbons
  - **Chemically-treated activated carbon adsorbent** - provides relative humidity control and adsorption of acid gases and hydrocarbons
  - **Silica gel and molecular sieve adsorbent** - Provides relative humidity control

## Benefits

**The ABA improves the reliability and extends the life of the device because the:**

- Breather prevents the passage of particles and liquids
- Diffusion channel reduces the amount of gases and water vapour entering from outer environment
- Adsorbent removes harmful gases and moisture vapour from incoming air
- Adsorbent controls the humidity level inside the device

# Adsorbent Breather Assembly

## Design Characteristics

Dimension	Range	Tolerance
<b>W</b> Width	7 - 25 mm (0.28 - 0.98")	± 0.25mm (0.01")
<b>L</b> Length	7 - 25 mm (0.28 - 0.98")	± 0.25mm (0.01")
<b>D</b> Diameter	7 - 25 mm (0.28 - 0.98")	± 0.25mm (0.01")
<b>H</b> Height	4 - 15 mm (0.16 - 0.59")	± 0.25mm (0.01")

## Packaging Options

- Supplied in stackable trays and sealed in metalised vapour barrier bag
- Bulk packed in metalised vapour barrier bag
