

24" x 24" Pre-Filters in Reusable Frames

F5 or G4 Pleated Synthetic in Plastic Frame

Install these economical plastic frames once, then choose from among 3 pre-filters to get exactly the efficiency level you need. The two faces of the plastic frame nest together easily and securely, and can be re-used time after time. The media is resistant to moisture and may be incinerated for disposal.

Media choices:

- F5 (50% dust spot)
- G4 (90% arrestance)
- Poly Foam

Dimensions

- Inches: 23.5" x 23.5"
- Mm: 596 x 596 mm
- Either 2" or 4" deep (nominal.)

3 pieces comprise this pre-filter: frame front & back, and pleated media insert.

Poly foam insert is resistant to water aging, great in humid/wet environments.

2-Stage Poly Pad in Metal Frame

Unique polyester pad has a pre-filter layer in front of a denser layer to provide 2-stage filtration for a variety of applications. The denser layer is infused with an aggressive tackifier to hold the dust. 24-gauge galvanized steel frame is hinged so that getting the filter pad in/out is easy and fast. The welded wire backing holds the media in place and eliminates any fear of FOD.

Dimensions

- Inches: 23.5" x 23.5"
- Mm: 596 x 596 mm
- Either 1" or 2" deep (nominal.)
