

Tank/Reservoir Level Gauges

Applications

To accurately monitor the oil level in your tanks and reservoirs, choose Donaldson level gauges. Three models indicate oil level and temperature, 35° to 210°F (30° to 90°C). Two models indicate oil level only.

Features

Transparent lens material is protected by metal bar with BunaN seals.

Maximum working pressure for all models is 14.5 *psi* / 1 bar / 100 kPa for pressurized tanks.

Recommended bolt tightening torque is 10 lbs-ft, with inside nut for tightening directly on the tank.

Suggested mounting hole diameter: 11mm or 13mm.
