

Industrial 6x18" Elements

Dimensions:

Height 18" / 457mm

Diameter 6" / 152mm

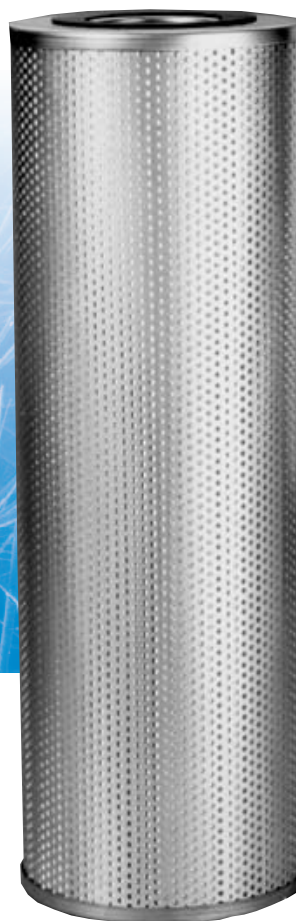

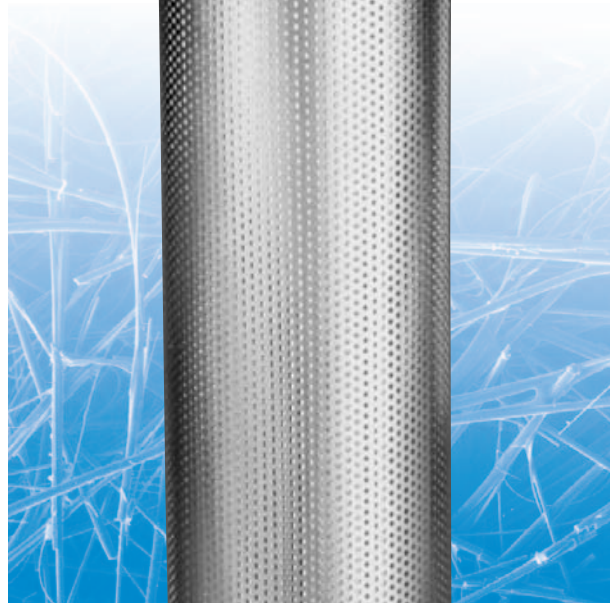

Inside Diameters Vary—see below

Features

Industry-standard 6x18" replacement filters are available with many media choices—simply select the cleanliness level that's needed for your application.

Dimensions fit standard industrial filter housings, and the filters accommodate flow up to 300 gpm per 18" unit. Use the elements singly, or stack multiples within the housing.

The filters are a direct replacement for 6x18 filters from Kaydon, Hilco, Pall, Parker, Baldwin, Nugent, and others. They are the industry-standard size for large lube oil applications, including air compressors, hydraulic return line circuits, etc.

6 x 18 Hydraulic Replacement Cartridges

Media Number	Media Technology	Efficiency	Part No.	ID
½	Synteq®	β=1000* <5μm _(c)	P178729	2.6" / 66mm
1	Synteq®	β=1000 6μm _(c)	P176202	3.2" / 81mm
2	Synteq®	β=1000 9μm _(c)	P170102	2.6" / 66mm
9	Synteq®	β=1000 23μm _(c)	P170103	2.6" / 66mm
9	Synteq®	β=1000 23μm _(c)	P176205	3.2" / 81mm
3	Cellulose	β=1000 24μm _(c)	P550212	2.6" / 66mm
10	Cellulose	β=1000 23μm _(c)	P550213	2.6" / 66mm
25	Cellulose	β=200 32μm _(c)	P550216	2.6" / 66mm

* Beyond the capability of the particle counter.

Donaldson has the industry's *Largest Selection* of Replacement Hydraulic Filters!

In-stock, ready to ship to you!
